

Identifying missing mandatory

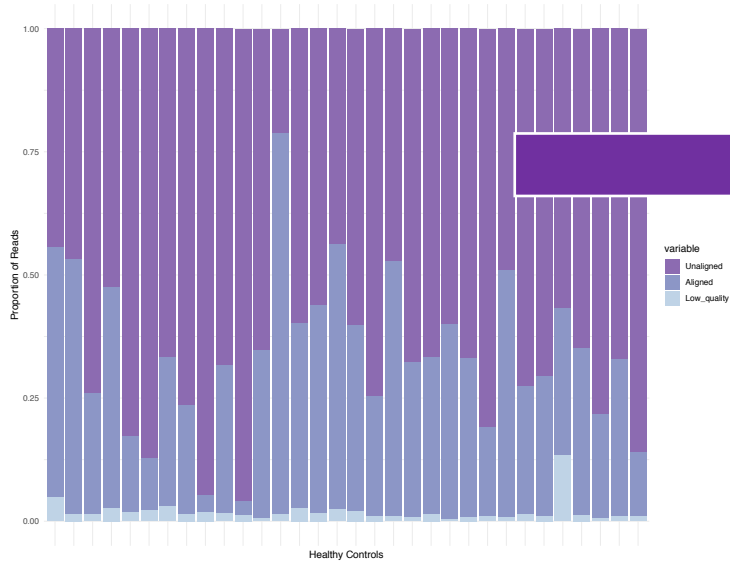

363,525,943 reads
BLASTn to HTGs,
viral, EST_others,
and nt databases

Retain top hit from
each sequence >50
coverage and >90%
identity

18% of unaligned reads aligned to at least one genome in a public database

Identifying missing microbial taxa

363,525,943 reads
BLASTn to HTGs,
viral, EST_others,
and nt databases

Retain top hit from
each sequence >50
coverage and >90%
identity

18% of unaligned reads aligned to at least one genome in a public database

Identifying missing microbial taxa

- *Malassezia*,
Cutibacterium,
Acinetobacter
- *Pinus*, *Canis*, *Triticum*
